CERTIFICATE

This is to certify that the Lab work entitled "LAB COURSE COMPUTER NETWORKS" carried out by Vaishali Kathariya (1BM20CS179), who is a bonafide student of B. M. S. College of Engineering. It is in partial fulfillment for the award of Bachelor of Engineering in Computer Science and Engineering of the Visvesvaraya Technological University, Belgaum during the year 2022-23. The Lab report has been approved as it satisfies the academic requirements in respect of a Computer Networks - (20CS5PCCON) work prescribed for the said degree.

 $LAB\ 01$: Creating a topology and simulate sending a simple PDU from source to destination using hub and switch as connecting devices.

Simple PDU using Hub

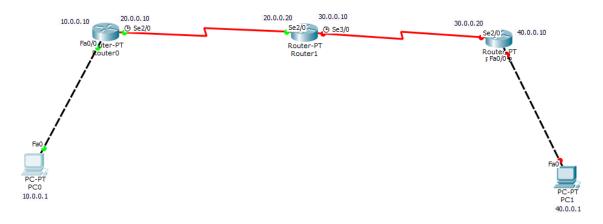

Simple PDU using Switch

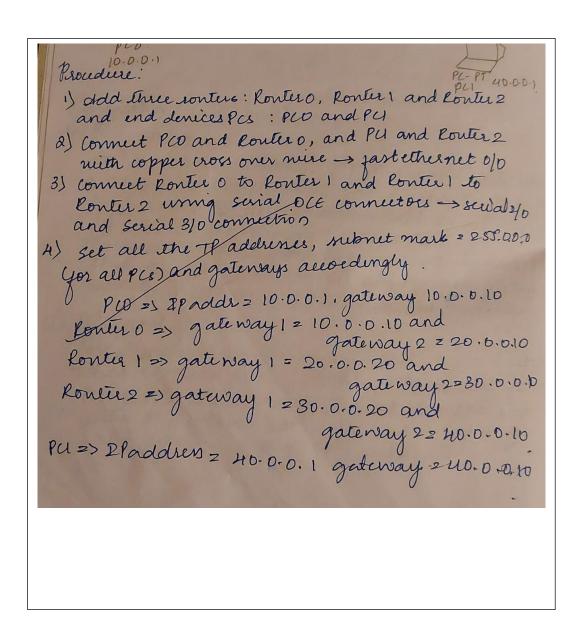

Lab-01 Hub and smutch din : To create a topology and cimulate sending Simple Por from source to distination win Thib's and Smitch as connecting devices Procedure 1) Pc and thub as connecting durices 2) Add alleast four PCS to the network. Set IP add 3) Adda Generie Hub to The network. 4) Once the connection is established, send a simp PDU from one PC to other PC and sun for Simulation mode. 5) In real time mode, ping PC2, where the fore replies are received from the PCs to the pac - and Pc Through the Hub. PC and Smitch as connecting denices 1) Add PC's to the network set I Paddress & a the PCs in the network dry dicking on I the PC and going to fast Ethernet category in the longing tab 2) Add a generic server to the network S Connect the PC's and The Suitch using Copp straight Throngh nice. 1) Once the connection is established, senda sin . PDV from one PC to other PC and run for Emulation mode. In real time mode, ping a PC, where four replies are received from other fcs to The particular pc through the Krib.
